Title: Login Usecase Text

Author: Raj Zaveri

Group Name: LionPals

BASIC COURSE:

The system displays the Login Page to the User. The User enters an E-mail Address into the E-mail Address Field and a Password into the Password Field, then the User clicks the Login Button. The system verifies that the E-mail Address is registered to a User Account in the User Account Set and that the Password matches the Password for the User Account, then the system displays the Friends Page.

ALTERNATIVE COURSES:

The User submits an invalid E-mail Address: The system displays the appropriate error message and redirects the User back to the Login Page.

The E-mail Address is not registered with a User Account in the User Account Set or the Password does not match the Password for the User Account: The system displays an error message and redirects the User back to the Login Page.

The User does not have an User Account: The User clicks the Signup Button, and the system redirects the User to the Signup Page.
