Nicolas Correa

Remove Friends Use Case

BASIC COURSE:

The system displays the <u>Friends Page</u> to the <u>User</u>. The <u>Friends Page</u> displays the accounts listed in the <u>User Friend List</u> from the <u>User Account</u>. The <u>User</u> clicks the <u>Remove Friend Button</u> on an entry for a <u>User Account</u>. The system displays the <u>Confirmation Prompt</u> to the <u>User</u>, and the <u>User</u> confirms the prompt. The system removes the <u>User Account</u> from the <u>User Friend List</u>. The system refreshes the <u>Friends Page</u> and displays the updated <u>User Friends List</u>.

ALTERNATIVE COURSES:

The <u>User</u> is not logged in: The system redirects the <u>User</u> to the <u>Login Page</u>.

The <u>User Friend List</u> is empty: The system displays a message prompting the <u>User</u> to return to the <u>Recommendations Page</u>. The <u>User</u> navigates to the <u>Recommendations Page</u>.

The <u>User</u> declines the <u>Confirmation Prompt</u>: The system returns the <u>User</u> to the <u>Friends Page</u>; no changes are made to the <u>User Friends List</u>.
